

**CLIENT:** Cuyahoga Valley National Park  
**PROJECT:** Park Information Display

## Overview

Situated in the Cuyahoga river valley between the cities of Akron and Cleveland Ohio, the Cuyahoga Valley National Park is a site of nature renewed that features over 32,000 acres of river and forests featuring dozens of miles of hiking, biking, and running paths as well as the Cuyahoga Valley Scenic Railroad that travels the historic Ohio and Erie Canal Towpath. Partnering with Design Minds and Color-Ad, Redmon provided the Cuyahoga National Park's Boston Mill Visitor Center with an attractive digital display intended to help visitors to the park get the information necessary to get the most out of their time at the park. Park Staff use Redmon's cloud-based content management system and existing data services to display important park and safety information as well as to present upcoming park calendar activities.

## Applied Skills

- Deployed Transit Display software
- Graphic design and Illustration
- UI design
- XML, Multimedia Authoring
- Project management
