

**CLIENT:** Transurban  
**PROJECT:** Transurban Video Wall

## Overview

Redmon Group designed, configured, and installed a six-display video wall in the new headquarters of Transurban in Tysons Corner, Virginia. The video wall includes a real-time arrival information Transit Display, two displays dedicated to Transurban's marketing photos and video, and three displays configured to stream live video from Transurban roads around the world.

## Approach

Using Redmon's content management system, Transurban staff can easily update information on their Transit Display or their marketing images anytime.

## Applied Skills

- Graphic design
- UI design
- Multimedia authoring
- XML, ActionScript, AIR, Cold Fusion and MySQL development
- Data modeling
- Streaming video protocols
- Hardware integration
- Project management
